

## **Coating Lines, Spray Equipment, and Accessories**

### **Coating Lines**

L.T. Coatings Inc. will custom design a coating application line to meet a variety of needs and budgets. All line designs are a one coat-one pass application, with or without infrared drying. Vinyl lineal coating lines have mechanical masking (no taping) and can be semi or fully automated.

#### **LT-ELLA-1 Extrusion Coating Line**

The ELLA-1 coating application line has manual loading of 16-foot lineals (for 35 different profiles), loading 5 lineals at a time onto dollies designed to mask the profiles and transport the parts to the reciprocating 6-gun coating machine. The part is transversed in 16 seconds and is then manually indexed to coat the next part. The process coats 5 lineals in about 3 minutes. The line can also be used to coat doors.

### **Spray Equipment**

L.T. Coatings Inc. is a distributor for Walther Pilot conventional and medium pressure spray guns, as well as pressure pots and spray packs.

### **Accessories**

Parts, filters, and specialty equipment are available upon request. Market research can be undertaken to locate equipment that meets any required use or specifications.
